

Monthly Shelter Statistics for August 2014

Effective July 1, 2013, the Florida State Legislature passed data reporting requirements of all public and private animal shelters, humane organizations or animal control agencies operated by a humane organization, or by a county, municipality, or other incorporated political subdivision. St Johns County Animal Control has operated with transparency on sheltering data, including intake and euthanasia records, since the agency's inception.

Although the State is requiring all agencies to compile data into specific categories, the law does not define the individual classifications. In order to avoid subjectivity, St Johns County has defined the required categories. These definitions are specific to St Johns County and may not be applicable to other counties.

St Johns County encourages reporting transparency for all animal welfare organizations, including those not required by law. Only through collaborative collection of data from every organization and individual involved in animal sheltering and rescue, will we achieve a true and accurate accounting of animal welfare in each community

Species Category

Dogs - All domestic dogs, including neonates, including captured/trapped feral dogs.
